

Kitchen measuring worksheet

A tape measure, a pencil and this worksheet are all you need. Measure in inches, write everything down, and send it to us. One of our designers checks every number before anything is drawn, and approximate numbers are fine to start.

How to measure

1. Sketch the room from above on the graph paper (page 3). Letter every wall A, B, C... going around the room, and note how each end of a wall finishes: a corner, an open end or a doorway.
2. Measure each wall corner to corner at three heights: at the floor, at counter height (36") and at 84". Write down the smallest of the three.
3. Locate each window and door from the same corner you measured that wall from: the distance to the outside of the trim, the width including trim, and for a window the sill height.
4. Mark the sink center, water and drain lines, gas, outlets, switches and vents the same way. Measure the ceiling height in three places.
5. Write down each appliance size or model number and tick the extras you want (page 5).
6. Check that the pieces of every wall add up to its total, take a photo of each wall, and send it all to us.

Symbols for your sketch

W	Window
D	Door (draw the swing)
S	Sink center
R	Range or cooktop
F	Refrigerator
DW	Dishwasher
G	Gas line
E	Outlet or switch
V	Vent or register

Good to know

- Inches only: 10 ft 4 in is 124". Round to the nearest 1/8".
- Measure the room, not the old cabinets. Walls are rarely square, which is why each one is measured three times.
- Mark anything that cannot move, like a radiator, a beam, a pipe or a chase in the corner.
- Not sure about something? Leave it blank and add a photo. Your designer will ask.

Your details

Example: an L-shaped kitchen

A made-up kitchen, filled in the way we like to see them: two walls, a window, a door and the appliances, every opening measured from the same point as its wall, and the notes below.

The room

Ceiling 96" (8 ft) in all three spots. No soffit.
W: window 36" wide with trim, sill at 42".
D: door 32" wide with trim, swings into the kitchen.
S: drain and water lines centered on the window.
G: gas line behind the range, 54" from the corner.
E: outlets marked on both walls. V: vent in the floor.

Appliances and extras

Refrigerator 36" wide, 70" tall.
Range 30" (gas), with a 30" hood above it.
Dishwasher 24", left of the sink.
Sink base 33", centered under the window.
Wall cabinets 36" tall.
Extras: crown molding, roll-out trays, wastebasket pull-out.

Check: wall A 66 + 36 + 42 = 144. Wall B 84 + 32 + 16 = 132. Both add up.

Every number on this page is an example. Use your own on pages 3 to 5.

Sketch your kitchen

Draw the room from above. Letter each wall, mark the symbols from page 1, and write each measurement along its wall.

Suggested scale: one small square = 6 inches, so one heavy square = 2 feet.

Done? Upload a photo of every page at www.rtacabinetsplus.com/pages/design for a free kitchen design.

Measurements

Walls (inches)

Wall	At the floor	At counter (36")	At 84"	Each end meets (wall / open / doorway)
A				
B				
C				
D				
E				
F				

Windows and doors

Wall	From corner	Width with trim	Sill height	Top of trim	Door swing

Plumbing, gas and electrical

Wall	Item (drain, water, gas, outlet, vent)	From corner	Height off floor

Notes

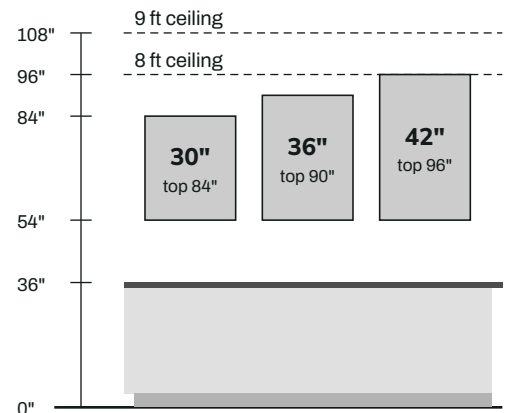

Questions? Call (305) 782-7587, Monday to Friday, 8am to 5pm ET. Free design within 1 business day, no obligation to buy.

Appliances and extras

Heights (inches)

Measure	Yours
Floor to ceiling (lowest spot)	
Soffit: bottom / depth (if any)	
Wall cabinet height you want	☐ 30" ☐ 36" ☐ 42" ☐ Not sure

Wall cabinets usually hang 18" above a 36" counter, so their tops land at 84", 90" or 96". The tallest that fits holds the most; a shorter one leaves room for crown molding.

Appliance sizes (inches)

Appliance	Width	Height	Depth	Make and model
Refrigerator				
Range or cooktop				
Wall oven (if any)				
Hood or microwave above				
Dishwasher				
Sink (bowl width)				

Cooking: ☐ Range ☐ Cooktop and wall oven

Above it: ☐ Range hood ☐ Over-the-range microwave ☐ Nothing

Extras you would like (tick all that apply)

- | | |
|--|---|
| ☐ Crown molding | ☐ Wastebasket pull-out |
| ☐ Light rail molding | ☐ Microwave base cabinet |
| ☐ Roll-out trays | ☐ Pantry cabinet |
| ☐ Pull-out spice rack | ☐ Fillers and end panels |

Send it to us

Photograph every page, plus each wall of the room, and send them our way. Your free design comes back within 1 business day.
